PROFILE

Systems Analyst focused on frontend development with React, TypeScript and Next.js. I build fast, accessible and maintainable interfaces, from design to deploy. Currently studying Industrial Maintenance, drawn to where software meets automation and Industry 4.0. Looking for my first tech role, remote or on-site in Mar del Plata.

PROJECTS

Personal portfolio 2026

franco-spatocco.vercel.app · source

- Bilingual (ES/EN) site built with Next.js 16, TypeScript, Tailwind CSS v4 and next-intl (localized routes, hreflang, sitemap), statically generated and deployed on Vercel with continuous deployment from GitHub.
- Custom design with a token system for light and dark mode; GSAP animations that respect reduced-motion preferences.
- Accessibility (keyboard navigation, AA contrast, semantic HTML) verified with browser tests using Playwright.

AI Dashboard — Grano & Co. 2026

demo · source

- Coffee shop dashboard with Next.js 16, TypeScript, Firebase and TanStack Query; weekly summary from the Claude API on the server, validated with Zod and rate-limited.
- CSP and security headers, Vitest tests, bilingual ES/EN; Lighthouse 100 for accessibility.

Laufen — running app 2026

demo · source

- GPS running app in Flutter and Firebase for Android, iOS and web: live map, per-km splits and intervals.

Client landing page In development

Next.js · Tailwind CSS · GSAP

- Landing page with GSAP animations built as a freelance showcase, targeting Lighthouse 95+.

EXPERIENCE

Sales and stock assistant — Housewares store 10/2025 – 07/2026

- Customer service and counter sales, including cash register handling.
- Stock replenishment and administrative tasks using Microsoft Office.

EDUCATION

Systems Analyst — Instituto Superior de la Empresa (HILET) 2024

Industrial Maintenance technical degree — Instituto Superior de Formación Profesional N.º 196 2025 – in progress
